

**Mellen School District
Strategic Plan
2012-2017**

Belief Statements

Equip students to succeed in critical thinking, technological knowledge, and other 21st Century Skills after graduation.

Recognize that students learn with individual styles.

All students deserve a high quality and diversified education.

We believe the District should seek and develop creative funding.

School + Community = Success

Mission Statement

Work collaboratively in a respectful, responsible, safe, and ready environment to create an education where all students will succeed.

Vision Statement

To become a world-class community school of choice that maximizes technology and innovation.

Objectives

By 2017, reduce our energy consumption by 5%.

By 2017, promote a distinct school identity that attracts and retains students.

Continue to strengthen the partnership between the school and community.

Strategies

We will bring all facets of energy consumption up to modern standards.

We will generate career explorations and readiness skill opportunities at the high school level.

We will seek partnerships with local businesses to promote the local economy and encourage real world learning for our students.

We will conduct a survey to determine school and community needs and develop a plan to meet those needs.
